Project Introduction

Meridian Health is a modern, premium static telemedicine portal designed to provide virtual patient consultations.

Developed as an Applied ICT project, this website serves as a live mock clinic offering frictionless video appointments, secure end-to-end encrypted messaging, and on-demand clinical advice.

- ✓ Clean typography and modern design layout
- ✓ Responsive design built using purely vanilla CSS and HTML
- ✓ Intuitive scheduling interface powered by modular JS

 Static telemedicine portal

 Frictionless virtual booking

 Responsive multi-device layout

LICENSED PHYSICIANS • AVAILABLE NOW

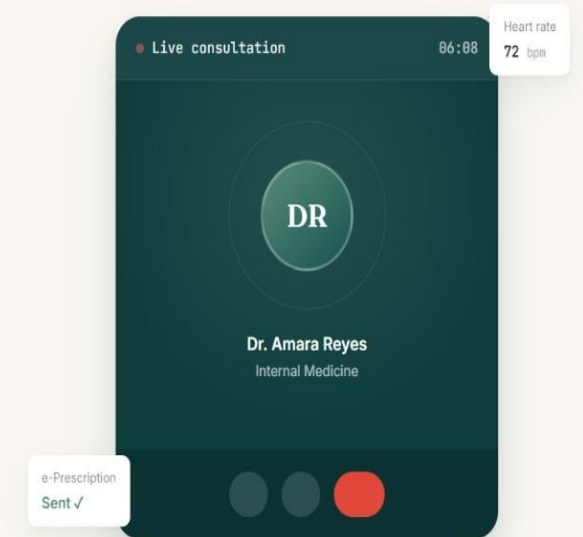

Talk to a doctor *before* it gets worse.

Video visits, secure messaging, and prescriptions — handled from your couch. No waiting room, no commute, no putting it off another week.

Book a video visit

See how it works

 12,400+ visits completed this month

User Journey: 15-Minute Consultation

THE VISIT, START TO FINISH

Four steps. About fifteen minutes.

Step 1

Tell us what's going on

Answer a few questions about your symptoms so we can match you with the right specialist.

Step 2

Pick a doctor and time

Browse real profiles, read reviews, and choose a slot — often within the hour.

Step 3

Meet over video

Join the call from your phone or laptop. Share photos or reports right in the chat.

Step 4

Get your plan

Leave with a treatment plan, e-prescription, or referral — sent straight to your records.

1 Describe symptoms

2 Select doctor & time

3 Meet over secure video

4 Receive care summary

Family Protection (\$39/mo)

Development & Code Snapshots

A granular review of HTML5 structure, CSS design tokens, and JS event-driven algorithms.

HTML Architecture & Structure

```
<!-- ===== NAV ===== -->
<header class="site-header" id="top">
  <div class="container nav-row">
    <a href="#top" class="brand">
      <span class="brand-mark" aria-hidden="true">
        <svg viewBox="0 0 32 32" width="28" height="28"><path d="M16 3v26M3 16h26" stroke="currentColor"
        />
      </span>
      Meridian Health
    </a>
    <nav class="main-nav" aria-label="Primary">
      <a href="#doctors">Find a doctor</a>
      <a href="#how">How it works</a>
      <a href="#chat">Chat & records</a>
      <a href="#pricing">Pricing</a>
    </nav>
    <div class="nav-cta">
      <a href="#" class="btn btn-ghost">Log in</a>
      <a href="#booking" class="btn btn-primary">Book a visit</a>
    </div>
    <button class="nav-toggle" id="navToggle" aria-label="Toggle menu" aria-expanded="false">
      <span></span><span></span><span></span><span></span><span></span>
    </button>
  </div>
</header>
```

Semantic & Accessible Structure

- </> Modern semantic HTML5 markup
- 🧑 ARIA roles for screen reader support
- ✓ Standard-compliant forms validation

CSS Design Tokens & Layouts

```
:root {  
  --ink: #2A2622;  
  --paper: #FAF7F2;  
  --sand: #E8DCC8;  
  --sand-deep: #DCCBAE;  
  --pine: #0F3D3E;  
  --pine-light: #18534F;  
  --pine-pale: #E4EDE8;  
  --terracotta: #C75C3D;  
  --terracotta-dark: #A8472C;  
  --sage: #5A8C7A;  
  --line: rgba(15, 61, 62, 0.14);  
  
  --font-display: 'Fraunces', serif;  
  --font-body: 'Inter', sans-serif;  
  --font-mono: 'JetBrains Mono', monospace;  
}
```

Centralized Style Variables

-  Unified, dynamic token palette
-  Flexbox & Grid layout configurations
-  Smooth responsive media breakpoints

JavaScript Interactivity Engine

java.script

```
// ===== Mobile nav toggle =====  
const navToggle = document.getElementById('navToggle');  
const mainNav = document.querySelector('.main-nav');  
if (navToggle) {  
  navToggle.addEventListener('click', () => {  
    const isOpen = mainNav.classList.toggle('is-open');  
    navToggle.setAttribute('aria-expanded', isOpen);  
  });  
}
```

Vanilla Interactivity Logic

- ⚡ Low-latency dynamic lists filtration
- 🕒 Animated chat state simulation
- 📅 Interactive real-time booking triggers

Thank You!

Any questions or feedback regarding Meridian Health?

We extend our sincere thanks to our respected instructor for guiding us
throughout this AICT project implementation.
